

STEM AMBASSADORS

Employers have a key role to play in closing the UK's skills gap.

Encourage your staff to volunteer as STEM Ambassadors and help young people to see a future in the employment opportunities you offer.

By supporting our nationwide programme, you gain opportunities to:

develop young people's employability skills

raise brand awareness and links in the community

safeguard the future of STEM careers in the UK

increase your employees' sense of achievement and satisfaction with their work

9/10

young people increase their understanding of why STEM subjects are important in the workplace

"Siemens is passionate about the STEM Ambassadors programme; it enables our staff to develop their own continuing professional development, whilst making a real difference to the communities they work in. The support and training our staff receive is exemplary."

Brenda Yearsley, UK Schools and Education Manager at Siemens

Create a new world of possibilities for young people

STEM AMBASSADORS AND EMPLOYERS

We work with employers of all sizes from a range of sectors to raise awareness of STEM pathways and careers.

Your employees will have access to resources, online training and ongoing support.

Our network of STEM Ambassador Hubs across the UK can help at any stage, from recruitment to induction. They offer local expertise and community links to support your business.

“When it comes to engagement it isn’t just about going into the local community and changing young peoples’ minds. It’s about helping them to understand the value of STEM subjects and how rewarding a career in science, technology, engineering and maths can be.”

Don Clark, Analytical Scientist and lead STEM Ambassador at Pfizer
