

# Meet our STEM Ambassadors

We are providing opportunities for classes of local GCSE students to interact with our STEM ambassadors online to discuss careers in STEM. These 20-minute sessions will be interactive, with plenty of opportunities to ask questions.

## A little more about STFC Daresbury Laboratory:

- We are a UK government funded Science facility based in Halton
- There is no charge to schools for this engagement
- Our work covers a breadth of science and engineering; from computing to building particle accelerators and beyond
- Our staff come from a variety of backgrounds and routes into STEM, including apprenticeships. We believe that STEM and STEM-support careers are for everyone!
