BAE SYSTEMS

Gain a unique insight into the work of an engineer...

At BAE Systems, we provide some of the world's most advanced, technology-led defence, aerospace and security solutions. We employ a skilled workforce of 89,600 people in more than 40 countries. Working with customers and local partners, we develop, engineer, manufacture, and support products and systems to deliver military capability, protect national security and people, and keep critical information and infrastructure secure.

What is it and where?

This is an online work experience programme running over five days.

You will work on meaningful engineering projects, and virtually meet engineers and technologists from across our business.

This will provide an opportunity to learn about our products and how we work.

Who we are looking for?

We are looking for 16-18 years olds, who are UK residents and currently in full-time education.

If you are interested in engineering as a career path through higher education or apprenticeship schemes then this will give you the insight needed to make those big decisions in life.

How does this help you?

Working in a supportive and inclusive environment, you will develop fundamental skills such as communication, collaboration, and creativity.

You will gain an insight into the different sectors of engineering, whilst learning what it is like to work at global technology company.
